

FRONTEND DEVELOPER

Interior Design Company Portfolio Website

Assignment Type	Frontend Development
Recommended Stack	Next.js + Tailwind CSS
Submission Deadline	Within 48 hours of receiving the assignment

Please read all requirements carefully before starting the assignment.

1. Assignment Overview

This assignment assesses the candidate's ability to translate a website requirement into a clean, responsive, visually engaging, and maintainable frontend application.

The evaluation will focus on:

- UI/UX design sense
- Frontend implementation
- Visual presentation
- Usability
- Responsive behavior
- Component reusability
- Code quality

2. Project Brief

Build a modern, elegant, and responsive Interior Design Company Portfolio Website for a professional interior design studio. The website should showcase the company's design expertise, completed projects, services, design approach, and company information.

The overall design should feel premium, minimal, professional, and visually focused, with strong use of interior and project imagery.

Brand Information

Brand Name	Neo Interior Studio
Category	Interior Design & Architecture
Target Audience	Homeowners, apartment owners, office owners, restaurants, commercial spaces, and property developers
Brand Personality	Modern, Elegant, Minimal, Premium, Professional, Trustworthy

3. Technology Requirements

- Next.js
- Tailwind CSS
- Lucide React
- Other commonly used frontend libraries may be used where appropriate
- The project must be properly structured, maintainable, and suitable for continued development

4. Required Pages

Home Page

- Navigation / Header
- Hero section
- Short introduction about the company
- Featured interior projects
- Services section
- Project categories
- Design process / workflow
- Why Choose Us section
- Client testimonials
- Call-to-action / Consultation section
- Footer

Projects / Portfolio Page

- Project grid / gallery
- High-quality project images
- Project name
- Project category
- Short project information
- Category/filter option
- At least 8 sample projects
- Hover interaction or project preview
- Responsive project layout

Project Details Page

- Project image/gallery
- Project name

- Project category
- Project location
- Project description
- Design concept
- Design services provided
- Project images
- Project details/specifications
- Related projects
- Request Consultation button

Services Page

- Residential Interior Design
- Commercial Interior Design
- Office Interior Design
- Restaurant & Café Design
- Space Planning
- Furniture & Lighting Selection
- 3D Visualization
- Interior Renovation

About Us Page

- Company introduction
- Vision / Mission
- Design philosophy
- Company strengths
- Team section
- Experience / achievements section
- Call-to-action

Contact / Consultation Page

- Contact information
- Office/location information
- Email / phone information
- Consultation form
- Name field
- Email field
- Phone field

- Project type
- Message field
- Submit button
- Map/location section (static or embedded)
- No backend submission is required

Suggested Project Categories

- Residential
- Living Room
- Bedroom
- Kitchen
- Office
- Restaurant
- Commercial
- Luxury Interior

5. Required Functionality

- Navigation between pages
- Project details navigation
- Portfolio category/filter interaction
- Project image/gallery interaction
- Responsive mobile navigation
- Working buttons and links
- Service navigation
- Related project navigation
- Consultation form UI
- Smooth scrolling where appropriate
- Hover and interactive states
- Mobile menu interaction

No backend, database, authentication, CMS, or API integration is required. Dummy or static project data may be used.

6. UI / Design Expectations

The website should have a strong visual identity suitable for a professional interior design company.

- Clean, modern, and elegant interface
- Premium visual appearance
- Clear visual hierarchy

- Strong typography
- Consistent spacing and alignment
- Balanced color combination
- High-quality project image presentation
- Well-designed project cards
- Professional buttons and CTAs
- Consistent section structure
- Proper use of whitespace
- Subtle and meaningful animations/interactions
- Avoid unnecessary decorative elements

The design should prioritize visual storytelling through interior design images.

7. Responsive Design

The website must work properly across different screen sizes.

- Navigation
- Hero section
- Project grids
- Image galleries
- Typography
- Buttons
- Forms
- Section spacing
- Mobile layouts

The website must support:

- Desktop
- Tablet
- Mobile

8. Figma / Design Reference

You may create your own design in Figma before development if you prefer. A Figma file is not mandatory. You may also directly develop the website based on your own design concept. The quality of the final implementation and overall visual experience will be the main consideration.

9. AI Tools

AI tools are allowed during the assignment. You may use AI coding or design assistants when needed. However, you should understand the code you submit and be able to explain the following during the interview:

- Implementation decisions
- Component structure
- Design decisions
- Responsive approach
- Technical choices

10. Code Quality

- Clean and logical folder structure
- Reusable components
- Meaningful component and variable names
- Organized and readable code
- Responsive styling
- Proper use of Next.js concepts
- Proper use of Tailwind CSS
- Reusable project/service components
- Proper use of Lucide React
- Avoid unnecessary duplicate code

11. GitHub Requirements

Create a public GitHub repository for the project.

- Complete source code
- README file
- Setup and run instructions
- Technologies used
- Project overview
- Relevant project notes, if any

12. Live Deployment

Deploy the project using any suitable hosting platform.

- Vercel
- Netlify
- Another suitable hosting platform

A working Live Website URL must be submitted.

13. Submission

Deadline: Within 48 hours of receiving the assignment.

Please submit the following information through WhatsApp:

- Candidate Name
- GitHub Repository Link
- Live Website Link
- Figma Link (if available)

14. Evaluation Criteria

We will evaluate:

- How you structure the application
- How you translate a design idea into code
- Understanding of responsive UI
- Component reusability
- Overall visual quality
- Portfolio presentation
- User interaction
- Code readability
- Attention to small details
- Typography and spacing
- Image presentation
- Overall user experience

A simple but well-executed website is preferred over an unnecessarily complicated implementation.

15. Final Note

There is no single correct design for this assignment. You are encouraged to make your own decisions regarding visual style, color palette, typography, layout, animations, and user experience while following the requirements provided in this assignment.

The final result should demonstrate your ability to build a production-style Interior Design Company Portfolio Website using modern Next.js development practices.

SUBMISSION DEADLINE: 48 HOURS
